THE « MAXIMUM » WALL EXHAUST TRAP

The wall exhaust vent can be connected to the pipe of a dryer, washroom fan or range hood which exits through the wall!

PROBLEM (OF OTHER WALL EXHAUST TRAPS)

The damper freezes open or closed

You can feel the cold air coming in through your fan.

The damper is noisy, especially on windy days

The lint gets caught at the joint

Birds or rodents are entering or chewing there way in through the wall Vent.

Exhaust vent cracks and breaks easily.

SOLUTION: THE MAXIMUM WALL EXHAUST TRAP

DESIGN: The unit is designed to prevent the damper from freezing, even in our harsh winter conditions.

SILENT: Unit is designed to prevent the damper from making noise even in high gusts of wind.

BACK DRAFTS: The unit has a built in damper preventing cold air from entering, and the loss of warm air, thus saving you money on your energy bill.

REMOVABLE GRILL: Discourages birds or rodents from nesting.
Can be removed to clean off lint.

SOLID: Built from galvanized steel, it discourages rodents from chewing there way into the dwelling, or any other destructible abuse.

COLLAR: Trap comes standard with 9 inches collar,(no need of extension) preventing lint accumulation which causes obstruction to the air flow. The exhaust is channelled through the collar out the exit mouth of the trap thus eliminating condensation from within the unit. It also makes for a fast and easy installation.

DIMENSION: 3 inches, 4 inches, 5 inches, 6 inches and 31/4 X 10 inches.

COLOUR: White
